ABOUT ME

Professional Landscape Gardener turned Front-End Web Developer. Able to translate the discipline learned in the landscaping industry into meaningful web projects utilizing my skills in modern front-end technologies. I am passionate and excited to continually grow my skills as a front-end web developer.

EDUCATION

2020 - 2021 • *Juno College of Technology*
Immersive Web Development Certificate
Accelerated JavaScript
Accelerated Web Development

2017 - 2020 • *York University*
Cognitive Science
Women's Bridging Program

EXPERIENCE

Landscape 911 2020

Owner/Independent Landscape Gardener

- Worked on local lawn and garden projects independently
- Work was obtained through word-of-mouth

York University 2020

Groundskeeper

- Solely managed grounds for assigned zone, Schulich School of Business
- Worked on teams to prepare for campus-wide events such as Tennis Canada, York9 Soccer
- Responsible for assigned vehicles, campus-wide building access

Kutting Krew 2017

Crew Leader

- Ensured completion of all daily lawn and gardening projects
- Guided crew to work efficiently while paying attention to detail

PROJECTS

No Thrills *React • Firebase*

Online store where items are populated onto the page using React and Firebase. Users can add and remove items from cart

Weather App *React • REST API • SCSS*

A weather application making two API calls - Open Call to convert location into latitude and longitude coordinates and Open Weather which takes that converted location data and provides the weather data. All data was converted from kelvin, UNIX, into readable formats.

Boat Ride Adventures *SCSS • ES6 Vanilla JavaScript*

PSD Conversion

Given a PSD site design with style guide, converted it into a pixel-perfect, responsive multi-page website.
